1. Overview

Insife HALOPV 5.1.4 is a patch release of bug fixes for HALOPV 5.1. It contains fixes and changes as detailed in section 3, to address some key identified bugs/tweaks. Further Patch 5.1.4 also includes few configuration updates as detailed in section 4, to enable users to access few existing HALOPV functionalities.

None of the issues included in this patch release have required any specification updates.

2. Upgradability

HALOPV 5.1.4 requires the environment to be on the HALOPV 5.1 version with the 5.1.1, 5.1.2 and 5.1.3 patch applied.

3. Bug fixes and changes in this patch

The following features have been updated or added in this patch release. Note that the listed Impact is associated with the issue *not* being resolved or implemented:

Area / Process / Group	Title	Description	Impact	Issue ID/ Specification
Aggregate Reporting	Fix for Incorrect Display of Case Narrative in Line Listings	Fixed an issue where case narratives displayed strange characters (e.g.,) when generating Ad Hoc report line listings.	Low - ensures proper narrative formatting in line listings	HLP-10745 *
ICSR	Event Additional coding information save on recoding via Quick Dropdown selector	Fixed Event Quick Dropdown selector to populate correct MedDRA Event Hierarchy when user changes the already selected event.	Medium - This may cause wrong MedDRA hierarchy to be saved with the record. Although happens only when user uses the Quick Dropdown selector to change the coded event, RECODE EVENT button is working as expected and first time event selection is also working as expected.	HLP-9234 *

Area / Process / Group	Title	Description	Impact	Issue ID/ Specification
ICSR	Autocalculation of E_I_6a & E_I_6b for completed ICSR	Fixed Autocalculation of E_I_6a & E_I_6b fields, now HALOPV will not autocalculated these fields if the ICSR is completed.	Low - This is display only issue as the ICSR cannot be saved once locked	HLP-10587 *
ICSR, System Config	Event rank is empty for imported ICSR's (imported via XML)	Fixed Event and Drug rank, HALOPV will not insert Rank as per Alphabetic Sort order. These fields are not in the ICSR E2B Standard but need to be inserted to properly population of Drug Event matrices and CIOMS form.	Low - This fix is to insert Rank as per sort order.	HLP-9301 *
ICSR, System Config	Bug Fix for Duplicate Tags Display	Resolved an issue where duplicate tags were displayed in the About section on Page 119 by updating queries.	Low - Improved tag display accuracy	HLP-10883 *
ICSR, System Config	Fix for Privacy Fields Visibility Without Privacy Data Access Role	Resolved an issue where privacy fields (mentioned below) were visible to users without the Privacy Data Access role. These updated functionality now checks field visibility settings based on the user's role and data element configuration. List of fields: Patient Initials or ID, Patient Date of Birth, Patient Social Security No., Patient Age at the time of Onset of reaction/event	Medium - Ensures compliance with privacy requirements	HLP-10888 *
ICSR, Submissions	Fix for Rechallenge/Dec challenge Inconsistencies on CIOMS Form	Resolved an issue to ensure correct Rechallenge and Dechallenge entries for products in the CIOMS form. Additionally, fixed the missing product rankings for all products in the form.	Low - Minor issues in CIOMS form	HLP-10383 *
Requirements Intelligence	Fix for Viewing SMQ Term	Fixed an issue where users encountered an issue when attempting to view SMQ term collection details by	Low - users can now view term collection detail	HLP-11036 *

Area / Process / Group	Title	Description	Impact	Issue ID/ Specification
	Collection Details	clicking the green "Show term collection details" icon. This action resulted in an unexpected error.		
Submissions	Fix for MedDRA Version Mismatch in E2B R2 Submissions for "drugrecuration"	Fixed an issue with E2B R2 submissions, where the drugrecuration element contained outdated MedDRA versions and event codes that were not aligned with the latest revision of the case.	High - Improved E2B R2 submission accuracy	HLP-11175 *
System Config	Update to System Access Log for Tenant-Specific User Visibility	Fixed an issue where under Application Management > System Access Log, logins from all tenants were previously shown. The Interactive Report SQL on Page P102 has been updated which ensures that the System Access Log will display all users who have access to the current entity.	Medium - Enhanced visibility of users across tenants in the system access log	HLP-9280 *
System Config	Fix for Workflow Completion Error in Duplicate Search Auto-Routing	A bug was identified when the duplicate search configuration auto-routed cases to the "ICSR Duplicate" workflow step. The system encountered an error, stating "Workflow for the provided task ID not found," due to the absence of a next step in the workflow. The issue has been resolved by updating the GOM_COMPLETE_WF_STEP_NEW_TASK procedure to handle scenarios where no subsequent workflow step exists, preventing task completion errors.	Medium - Prevents errors when completing workflows with no subsequent steps	HLP-11199 *

***This ticket does not require an update to System Specification/ Design Specification.**

4. Configuration updates in this patch

The following configuration updates have been included in this patch:

Area / Process / Group	Title	Description	Impact	Issue ID
System Config	Multi-Tenant Normal Login Disabling with SSO Integration	Enhanced login configuration to support multi-tenant customers using SSO, allowing tenants to disable normal login.	Low - This update improves login control for multi-tenant environments by enabling an option to restrict access exclusively to SSO	HLP-10880 *

***This ticket does not require an update to System Specification/ Design Specification.**
